4 December – World Nuclear News snippet:

A Japanese court today nullified the government's approval of the safety measures for two reactors at Kansai Electric Power's Oi nuclear plant in Fukui Prefecture, *Nikkei Asia* has reported.

The Osaka District Court ruled in favour of about 130 plaintiffs who claimed that units 3 and 4 of the plant are vulnerable to a major earthquake.

It is the first time a Japanese court has withdrawn government approval granted to a power company to set up a nuclear plant under new safety standards introduced following the 2011 Fukushima nuclear disaster, the news agency said.
